

Alvydas Stauskas photography exhibition "Water metamorphoses"

In the photography exhibition "Water Metamorphoses", the artist invites to reflect and feel the changing world around us in the language of water: water flow, fog, ice, objects frozen in ice. A. Stauskas avoids intricate undertones, conveys the beauty of nature in calm tones of colour, and harmony is enriched by mystical plots with a philosophical undertone.

This exhibition will be displayed in the gallery of Zarasai Public Library until the city festival, August 15.
